(54) **METHOD OF POWDER PRODUCTION FROM SECONDARY TYRES RUBBER**

(57) Abstract:

FIELD: production of powder from  
secondary tyres rubber as substance to  
produce regenerate or rubber mixtures.  
SUBSTANCE: method is realized in extrusion  
apparatus under thermal and mechanical

action carried out at least in two in series  
located sections of extrusion apparatus,  
that have shift zones, in which speed of  
shift is changing according to formula given  
in method description. EFFECT: improved  
process. 2 cl, 1 tbl
